Claim Rejections - 35 USC § 112

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 7, “the method” (line 1) lacks antecedent basis because no ‘method’ has previously been identified.

Claims 1 – 7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In claims 1 - 7, there are no established steps supporting ‘locating an object utilizing *inverse multilateration*.’ It appears undue experimentation is required causing the skilled artisan to not know as to how to use and/or make the invention the claimed invention.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sanderford et al. (US 5,917,449) and Cisneros et al. (US 5,774,829) both teach related method and system for locating an object utilizing multilateration.
